```

- This is a simple Employee Management System in Java using Array List Scanner It allows the user to create, display, and increase the salary of employees .Each employee has a name, age, designation, and salary. The program also performs input validation for age, designation, and salary A menu-driven approach is used to make the program easy to operate.

```
Console X
<terminated> EmployeeManagementSimple (1) [Java Application] C:\Users\vigne\Download

----- MENU -----
1. Create
2. Display
3. Raise Salary
4. Exit
Enter your choice: 1
Enter name: vig
Enter age (18-60): 18
Enter designation (p - Programmer, t - Tester, m - Manager): p
vig added with base salary 35000.0
Add another person? (yes/no): yes
Enter name: hh
Enter age (18-60): 30
Enter designation (p - Programmer, t - Tester, m - Manager): t
hh added with base salary 25000.0
Add another person? (yes/no): no

----- MENU -----
1. Create
2. Display
3. Raise Salary
4. Exit
Enter your choice: 2

----- EMPLOYEE LIST -----
1. Name: vig | Age: 18 | Designation: Programmer | Salary: 35000.0
2. Name: hh | Age: 30 | Designation: Tester | Salary: 25000.0

----- MENU -----
1. Create
2. Display
3. Raise Salary
4. Exit
Enter your choice: 3
Enter name of employee to raise salary: 5
